Cari Colleghi,
siamo orgogliosi di accogliervi al primo
Evento Multidisciplinare di Live Surgery:
Roboti-cARe.

Il Congresso coinvolge le seguenti Specialità:

Chirurgia, Ginecologia, Ortopedia, ORL, Urologia, Oncologia,
Medicina Generale, Anestesia ed Infermieristica.

L'approccio multidisciplinare rende possibile ampliare le potenzialità, ottimizzare l'utilizzo e ridurre i costi delle nuove tecnologie chirurgiche. La continua comparazione tra le figure coinvolte favorisce una maggiore crescita nelle abilità tecniche rispetto al normale approccio monodisciplinare. Dal 2010 questa è stata ad Arezzo la nostra esperienza con la chirurgia robotica e da questo nasce l'idea di **Roboti-cARe** che si propone non solo come evento di chirurgia robotica ma come un confronto a 360° sul trattamento chirurgico mininvasivo e le nuove tecnologie.

Ci auguriamo che l'ampia gamma di argomenti disponibili vi permetta di conoscere le applicazioni del robot e delle nuove tecnologie in Specialità diverse dalla vostra.

L'interazione con tutti gli Specialisti che ruotano intorno al Paziente ci darà la possibilità di poter approfondire, di potersi confrontare attivamente durante i lavori.

Vi invitiamo quindi ad essere parte attiva e non solo spettatori di questo Incontro.

Il Comitato Scientifico
